

proposed pay raise to lawmakers

Christopher P. Noun to me

Aug 11

A news report about a proposed 47% pay raise to lawmakers invited me to write you. Please use better judgment. The public at large is very disheartened by the conduct of many public officials – the two running for the Presidency are making things worse. Whether any raise is deserving is unimportant; the impression such an increase gives families struggling to make ends meet will contribute to a devastating impression of public servants.

You have a difficult job. Our major political parties continuously fight against each other which is never in the public interest. When both parties agree together to pass legislation that the public is grateful to receive NYS lawmakers will deserve respect from every community in America.

Thank you.

Sincerely,

Chris Noun
