

Legislators Proposed Pay Raise

raymondsa to me

Aug 2

According to the article in our newspaper, there is a proposal for a pay increase for the NYS Legislators of 47 percent.

This is the most outrageous idea of the day. Who in their right mind would even think of considering this amount of an increase???? Generally, people work at least 50 weeks, and these legislators are not working that many weeks. Besides the elected office they hold, most have employment outside of the Capitol; therefore making more than the normal middle class worker to begin with. Now, there is the proposal of giving them a 47 percent increase from the taxes of the hard working people of NYS. They are not worthy of that amount of increase for the work they're supposed to be doing for the citizens of NYS!! Most of their work is for themselves, by their "pet projects & kickbacks". And by the way, most laws enacted by the legislators are not fully abided by; where is the justice?? Thank You???
